SUMMARY

A dedicated software engineering undergraduate with practical experience in academic projects and relevant technical skills. Proficient in Java and web design, with a strong foundation in logic and teamwork. Seeking to contribute to innovative software solutions while advancing technical expertise.

PROJECTS

University Marks Calculation System

Technology: Python

- Developed a system to streamline the calculation of university marks for students and teachers, ensuring accuracy and efficiency.
- Allowed users to input student marks and automatically classify results as *Pass*, *Fail*, or *Defer*.
- Designed an intuitive, text-based interface for seamless user experience.
- Successfully simplified academic grading, improving efficiency for both students and staff.cv font sizes

Bookstore Website

Technology: HTML, CSS, JavaScript

- Created a visually appealing and functional e-commerce platform for selling books as part of a team project.
- Implemented responsive layouts to ensure accessibility on desktops, tablets, and mobile devices.
- Integrated a dynamic shopping cart and book search functionality.
- Prioritized user-friendly navigation and an appealing design to enhance the shopping experience.

Plane Ticket Booking System (CLI)

Technology: Java

- Created a command-line interface (CLI) application for booking plane tickets using Object-Oriented Programming (OOP)
- Implemented a **user menu** to navigate functionalities like booking tickets, managing user information, and viewing bookings.
- Included options for adding, updating, and removing bookings with robust input validation.
- Designed for clarity and usability, with detailed prompts and feedback for user actions.
- Demonstrated the potential of text-based interfaces for structured applications, showcasing the practical application of OOP principles.

Insect and Snake Bite Identification System

Technology: Cross-Platform (iOS, macOS, Android, Windows), Web App Development

- In the design and documentation phase of a cross-platform system for insect and snake bite identification.
- Will include mobile and web apps offering bite identification, insect heatmaps, and medical assistance (e.g., nearby hospitals).
- Aiming to provide comprehensive support through both mobile and web platforms.

EDUCATION

BEng (Hons) Software Engineering

University of Westminster

Expected Graduation: 2027

Key Modules

Software Development 1 and 2

Mathematics for Computing

Computer Systems Fundamentals

Software Engineering Principles and Practice

Trends in Computer Science

Object-Oriented Programming

Database Systems

Web Development

G.C.E Advanced Level Examination

Commerce Stream - 2021(2022)

2C and S

SKILL

Programming: Python, Java, JavaScript, HTML, CSS, MySQL

Tools and Technologies: IntelliJ, Visual Studio Code, PyCharm, Git

Soft Skills: Problem-solving, Teamwork

Languages: Sinhala, English

ACHIEVEMENTS

- Delivered project milestones on time while maintaining high-quality standards
- Designed and implemented user-friendly interfaces in multiple projects, ensuring efficiency and usability
